```python
def about(request):

    data = cartData(request)
    cartItems = data['cartItems']
    categories = Category.objects.all()

    context = {
        'cartItems': cartItems,
        'categories': categories
    }
    return render(request, 'main/about.html', context)
```
